

IT Audit and Information Security Program

Changing lives, shaping visions!

The IT industry is fast-paced, always evolving, and constantly in search of well-qualified people. It is an exciting field, and Information Security Analysts and IT Auditors are very much in demand.

A shortage of professionals in this field has led to elevated salaries for people with Information Security and IT Auditor skills. Entry level Information Security Analysts and IT Auditor professionals make an average of \$100,000 annually - 70% more than the median income. On average, Information Security and IT Auditors earn between \$97,500 to \$185,500 annually depending on the number of years' experience and location.

Information Security and IT Auditors

So, what part does Information Security and IT Audit play within the IT field? Modern companies are trending toward an integrated approach, in which these specialists are cross-trained in IT.

As companies have become more aware of the security risks inherent in the modern business world, the demand for those with crossover skills in both Information Security and IT Audit has increased.

You can take advantage of this trend through the Information Security and IT Audit Program we have developed at Kairos Vision Consult. We offer the perfect opportunity for you to enter this fast-paced world.

It does not matter if you are in the workforce or just out of school. Our innovative courses will teach you everything you need to know to enter this exciting field.

Our program consists of **IT Audit, Third Party Risk Management, and Risk Management Framework, all in one package.** You will graduate with knowledge in all three areas.

Remember, you don't need any prior IT experience to enroll in Kairos School. Our courses have been developed for people who have no cybersecurity experience or some knowledge. You just need to bring a can-do attitude, problem solving skills, and lots of grit.

Your goals matter to us at Kairos Vision Consult. Whether you want to develop new skills, advance your career, or change careers entirely - we are here to help you.

Our innovative, leading-edge cybersecurity courses and curriculum have been developed by cybersecurity experts who are trusted by the best people in the IT industry. We provide you with the training, technical knowledge, and real-world experience to ensure that you have the precise, leading-edge skills you need to succeed in this digital world.

You will graduate knowing precisely what employers are seeking, and you will be well prepared to take those first steps toward getting hired!

Student Testimonies

”

“At first, I wasn’t sure whether a career in the IT field was possible after being in the health field all my life. But after taking the class with Kairos Vision consult, I was able to acquire all the skills to be an Information Security Analyst. As a result, I was able to get my first job two months after the class, earning six figures. Joining Kairos Vision is the best decision I have ever made.”

- Penvy

”

“Kairos Vision Consult Cybersecurity Career training is one of the best courses I’ve taken in recent times. The curriculum gives you an excellent starting point in the industry. They provide a clear understanding of what is needed to succeed in the industry, and they help you succeed on the job as well. I will recommend Kairos Vision to anyone looking to get into this industry.”

- Paul

”

“My life and finances are forever changed because of Kairos Vision Consult. The level of care and attention the tutors pay to each student is bar none. Kairos Vision went above and beyond prepping and helping me every step of the way until I got hired. As a way of my gratitude, I enrolled my husband and I am confident the same level of success I achieved with Kairos Vision my husband will too. I am convinced beyond doubt that Kairos Vision is God sent to me and my family. They are truly changing and impacting lives. For those looking for a rewarding career and work-life balance, Kairos Vision is your BEST CHOICE”.

- Penvy

”

“I honestly want to appreciate Kairos Vision for changing my life and that of my family. I was introduced to the class by my wife after she took the course and got a job. I started the program not knowing anything about cybersecurity but now I can confidently say I have been given all the tools needed to be successful in the industry by the dedication and investment of Kairos Vision. Thank you for your constant encouragement and advice. I got a job right after the class. I couldn’t have done it without Kairos Vision. I am excited about my future. Please, if you are looking for a career change, Kairos Vision is the place to go. I highly recommend this class. You will thank me.”

- Pastor Felix

”

“Kairos Vision Consult is the best Cyber security class one can ever find. I signed up with Kairos Vision Consult with no Cyber security background. The Instructor, James, and his team provided excellent training using practical exercises and precise EC-Council-approved content. The instructors were excellent, extremely professional, and knowledgeable, and created a positive learning environment. As a result, I was able to get my first job two months after the class, earning six figures. Joining Kairos Vision is the best decision I have ever made.”

- Dr. Degraft

“In my opinion, Kairos Vision is one of the leading cybersecurity schools in the country. Their laser-focused approach to assisting students in acquiring the skills they need to pursue a cybersecurity career sets them apart from other schools. I joined Kairos School with no experience in Cybersecurity, however, within three months, they were able to prepare and equip me to obtain a job in Cybersecurity.

What I loved about the school is the number of tools and resources available to prepare students for cybersecurity careers. If you are considering a career in Cybersecurity, then Kairos Vision is the best option for you.”

- Kwabena

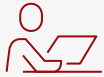

How The Program Works

We provide intensive training, and from the very first class, you'll dive into cybersecurity solutions and training. You will work on projects similar to the ones you will encounter out in the field. We offer many ways to promote your progress:

Teaching Staff

The instructor and his team of teaching associates are always readily available and accessible to help our students.

Recorded Classes

We record every class session so you don't miss out when you miss a class.

Software

We use specialized software for notes and completing assignments.

Hands On

You won't just study from a book. The hands-on work will ensure that when you undertake your first on the job assignment, you'll be on familiar ground.

Breakouts

During class sessions, you will be divided into breakout rooms, so you can interact and collaborate with your peers.

Groups

You will be assigned to a permanent group throughout the course of the program. Each group meets at least once a week to study and support each other.

Resume Development

We will build your resume during the class, so it will be ready when you begin to interview. Completion of the program is just the first step to your successful career. We help you succeed on the job.

Interview Preparation

We prepare you thoroughly for each interview, so you'll know what to expect. We organize mock interviews for each student, to let you get comfortable with the process.

Mentor

After you secure a job, you will be connected to a mentor, who will be available to give you insights, answer questions and provide feedback as you begin your career.

What Jobs Will I Be Prepared For?

IT Audit Jobs

An audit of information technology, or information systems, examines the controls within an IT infrastructure, and the associated business applications. The auditor will determine if the systems:

Safeguard assets

Maintain data integrity

Operate effectively to achieve organizational goals

As an Auditor, you will be responsible for the compliance of daily activities within an organization, and establishing standards, policies and procedures. You will examine and evaluate an organization's information technology infrastructure, applications, data use and management, policies, procedures and operational processes against recognized standards or established policies.

Third Party Risk Management (TPRM) Jobs

TPRM is the process of analyzing the risks associated with utilizing third-party vendors. You will assess your third parties who may be accessing your organization's data and customer information.

You will perform due diligence, a comprehensive investigation to determine if a third-party vendor is in compliance with security standards, and suitable for the task they have been assigned. This will be an ongoing initiative, because the world of cybersecurity is in a constant state of flux. Ultimately, the purpose of any third-party risk management program is to reduce the risk of security breaches, malicious data extraction, damaging operational failures, and other negative outcomes.

Risk Management Framework (RMF) Jobs

RMF is a unified information security framework for the entire federal government. As an RMF Analyst, you will be responsible for the creation, consultation, and ongoing assessment of documentation to comply with Federal Cybersecurity policies and guidelines.

Additionally, as the RMF Analyst for Cyber, you will evaluate information assurance compliance and coordinate program security documentation for various Federal agencies. You will provide insight and expertise on key solutions to best position a federal agency approach, prepare, and deliver new and emerging solutions.

The program will not only meet your expectation. It will exceed it.

You will graduate knowing precisely what employers are seeking, and you will be well prepared to take those first steps toward getting hired!

Kairos Vision Consult, LLC is a leading cybersecurity and managed security service provider that helps businesses fight cybercrime, protect data and reduce security risk. We offer a comprehensive portfolio of managed security services, consulting and professional services, and data protection technology.
